An Introduction to Vascular Surgery Course

A one-day course for medical students, foundation doctors and core surgical trainees considering a career in Vascular Surgery

Wednesday 17 and Thursday 18 April 2019
Olympia London Grand Hall

The Vascular Society of Great Britain & Ireland and the Rouleaux Club are excited to announce a combined initiative with the Charing Cross Symposium. We will be running An Introduction to Vascular Surgery Course for medical students, foundation doctors and core surgical trainees.

Attendees will be offered hands-on training in vascular anastomosis, vascular ultrasound and cannulation, as well as demonstrations of endovascular techniques. They will meet trainees and consultants with a passion for vascular surgery. They will also be given advice on how to develop their portfolio and how to apply for training in vascular surgery.

Attendees will get free entry to the CX Symposium (15-18 April 2019). An Introduction to Vascular Surgery Course is a one-day programme, taking place on both Wednesday 17 April and Thursday 18 April.

Any trainee wishing to sign up for this exciting opportunity should contact Dawn Nicholls at dnicholls@bibamedical.com.

Places are limited and applications will be accepted on a first-come-first-serve basis. Attendees will be asked for a deposit of £10 and proof of status to secure their place. We also ask that applicants choose a preferred day (Wednesday or Thursday) in advance.

All trainees attending the Introduction days will have the opportunity to write a report of their experience. The best report will be published in Vascular News.

Don't miss this opportunity to be part of the An Introduction to Vascular Surgery Course and CX 2019!
