

ACADEMY LIVE COURSES

14th and 15th January 2020

Johnson & Johnson Institute,
Hamburg, Germany

For the **first time ever**, ESVS is offering fantastic hands-on workshops on open and endo surgery using **in vivo models**.

COURSE 1:

Vascular Access Course (mini pigs)

Anatomic dissection for various surgical access sites to arteries and veins for elective and emergency vascular reconstructions and bleeding control.

COURSE 2:

Vascular Reconstructions (mini pigs)

Anatomic dissection and reconstruction of various arteries, including suture techniques and theoretical background.

COURSE 3:

Endovascular Treatment (cadavers)

Techniques for arterial interventions, including puncture techniques, balloon and stent application, and theoretical background.
